Digital Healthcare

Digital Healthcare Software Development

- ✓ Clinical Interoperability
- ✓ Dental
- ✓ EHR
- ✓ Hospital Inventory Management
- ✓ Medical Imaging
- ✓ Medical Chatbots
- ✓ Patient Portals
- ✓ Practice Management
- ✓ Regulatory Compliance
- ✓ Revenue Cycle Management
- ✓ Telehealth

Why Telliant for Your Digital Health Software?

Telliant successfully assists many healthcare companies with the rapid product delivery of exceptional products to the marketplace. We have in-depth expertise in healthcare information technologies. We are especially proud of our multi-year experience developing HIPAA and other regulatory-enabled (or compliant) solutions.

- 15 years in custom software development with specialties in healthcare IT.

- Healthcare compliance: HIPAA, HITECH, NCPDP standards and ONC requirements, IVDR, MACRA, MIPS, CEHRT,

- Healthcare standards; HL7, ICD-10, LONIC, CPT, XDS-1, FHIR, DICOM

- Established Lean, Agile, and DevOps culture.

TELLIANT™
Intelligent Software. Delivered.

Overcoming Healthcare Challenges with Technology

Compliance with federal, state, and foreign regulatory requirements such as HITRUST, HIPAA, FDA, CLIA, and NIST. Expert deployment of healthcare-specific interoperability protocols such as HL7 and FHIR. Integration with large-scale and specialty EHR platforms.

Implementation of modern tools and technologies – AI/machine learning; Big Data; Cloud Engineering and Cloud Deployment; Intelligent Assistants, and IoT rapidly and clearly.

EHR Software
Develop advanced medical records and electronic health record solutions for sensitive medical and clinical data.

Radiology/Imaging
Build interoperable imaging capabilities for EHRs for optimal clinical workflows.

Dental EHRs
Design and create practice mgmt software for dental specialties with treatment plans and charting for the unique needs of a DSO.

Remote Patient Monitoring
Build reliable digital health solutions for monitoring, collecting, and assessing medical data from everywhere.

Health Information Exchange
Design and develop HIE interfaces to be flexible data aggregation and management repositories.

Revenue Cycle Management
Development and maintenance of patient billing, insurance verification, claims submission, payments and reporting.
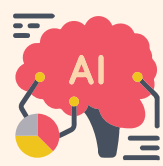

Mobile Healthcare Applications
Create user-friendly mobile apps for patients, secure and feature-rich mobile apps for doctors, and advanced clinical workflow apps for medical orgs.

Telemedicine Apps
Design, build and connect telehealth apps to EHRs and healthcare organizations for hospitals, clinics, and nursing homes.
