Intelligent Software. Delivered.

Our Mobile App Development Services

Telliant welcomes the possibility to assist in specific development stages and provide full-cycle mobile app implementation. Our mobile app development services include:

Back-End Development

Our back-end engineers build robust and secure mobile back ends to ensure smooth and quick data sync and transfer.

Mobile App Development

Our engineers have created 250+ stable, high-peforing mobile apps for various demanding industries. Using the latest technology innovations to delight your users.

Mobile App Integrations

We create seamless integrations with back-end applications and third-party appliations with expert API engineering.

Mobile App Maintenance

We assist businesses by assuring that mobile applications continue to perform the way they were intended. Mobile initiatives need to be evaluated over time to ensure optimum results.

Mobile Strategy Consulting

Our strategy consultants assist with app concept planning through completion. Advising on platform and device compatibility and optimizing costs.

UX/UI Design

Telliant's designers create impressive and intuitive interfaces that ensure engagement, transition, and easy adoption.

Web Development

We build mobile apps that complement web apps, web portals, online stores, or SaaS applications.
